A;Title: The rat mast cell antigen AD1 (homologue to human CD63 or melanoma antigen M A;Reference number: A46508; MUID:92340890
A;Accession: A46508
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             A;Cross-references: EMBL:X61654; NID:g55601; PID:g55602
A;Note: this antigen was found localized to mast cells in tissue samples, but was ind A;Note: sequence extracted from NCBI backbone (NCBIN:109346, NCBIP:109349)
C;Comment: This heavily glycosylated protein of 50-60% (27% after deglycosylation) is

"NAG-2, a novel transmembrane-4 superfamily (TM4SF) protein that
complexes with integrins and other TM4SF proteins.";
J. BIOL. CHEM. 273:29181-29189(1997).
-!- SUBCELLULAR LOCATION: TYPE III MEMBRANE PROTEIN.
-!- SUBUNIT: FORMS A COMPLEX WITH INTEGRINS.
-!- TISSUE SPECIFICITY: EXPRESSED IN MULTIPLE TISSUES BUT IS ABSENT IN
BRAIN, LYMPHOID CELLS, AND PLATELETS.
-!- SIMILARITY: BELONGS TO THE FAMILY OF SMALL TYPE-II MEMBRANE
                                                                                                                                                                                                                                                                                                                                                                 CARBOHYD

-!- SUBCELLULAR LOCATION: TYPE III MEMBRANE PROTEIN.
-!- TISSUE SPECIFICITY: HIGHEST EXPRESSION IN THE SPLEEN AND THE
KIDNEY. LOW EXPRESSION IN SKELETAL MUSCLE AND IN THE HEART.
-!- SIMILARITY: BELONGS TO THE FAMILY OF SMALL TYPE-II MEMBRANE
ANTIGENS (TM4 SUPERFAMILY).
